PADMATECH
INDUSTRIES PVT LTD

What We Offer in Breweries

Padmatech Industries is a professional manufacturer of “turn-key beer brewing system”. With strong experience of experts in brewery setup, we have supported brewers to build their dream breweries. We offer comprehensive service including layout, customized equipment manufacturing, installation and training of brewing technology. The total line of microbrewery equipment is manufactured in house which includes Grinding mills, Lauter tun, Mash kettle, Wort cooler, Beer fermentation tanks, Bright beer tanks and other customized ancillary process equipment including water treatment plant that enables meeting environmental pollution control norms by making the available water suitable for brewing systems. We also offer our customer complete brewing solution starting from selection / filtration the best grains to the end product and also provides compact effluent treatment systems to treat microbrewery waste water. The treated water could be used for various purposes.

Good quality equipment is guaranteed by professional technical support, advanced processing equipment, strict quality control and complete personnel training.

Insisting the idea that craft beer brewing should be in a popular style, we always keep our products affordable which may help more brew masters to approach their dream.

Join Padmatech and start your beer brewing business! We offer services relating to Nano brewery, Microbrewery and Winery.

Nano Brewery

- Nowadays nano breweries are getting popular around the country, not only getting a more popularity by young crowd but also evolving regulatory attitudes toward brewery business.
- According to The Food Section , a Nano brewery is “a scaled-down microbrewery, often run by a solo entrepreneur that produces beer in small batches.”
- The beer is brewed in small batches, and often has a limited quantity of each brew. With small batches a brewer can control the quality and wide range of styles can be brewed. Nano brewery can produce approximately 200 liters of beer per day and brew length can be increased after some modification on the equipment without any hassle.
- Nano brewers are also benefiting from an increased awareness of small brewing's economic potential.

Microbrewery

Padmatech provides one stop solution to brewers. We have a futuristic vision and next gen technology solutions for complete line solutions in the segment offering the most cost-effective, efficient and optimized technology covering all aspects from design, interiors, ambience and equipment finishes along with the most advanced brewing equipment to produce the most amazing quality of beer. Padmatech will be pioneer for progress and growth ensuring your success and future. With our prodigious experience in microbrewery/ pub brewery, we are always with you in progress building bridges for your growth and breaking barriers to excite new customer demand and expectation.

We provide you with start-to-end solutions – from concept to product. We offer free consultation in all aspects of your requirements including design. Our services does not end here, as we provide after sales service such as training to the operators, further consultation services in accordance to a client's needs.

Our Highlights:

- One stop solution from planning to beer production.
- High-quality craftsmanship along with state-of-the-art technology.
- ISO 9001–2015 certified.
- High-quality internal and external welding and polishing.
- Clear beer by lauturant machine only in 2 hrs.
- Provide easy handling and tight seal equipment
- Successfully implanted standard brewing process time.
- The components in the system are made of stainless steel (SS-304).
- The Brew House can come in a variety of finishes – Copper, Gold, Mirror and Matt.
- A microbrewery can go up to 41,000 liters capacity per month depending on scaling of the equipment.

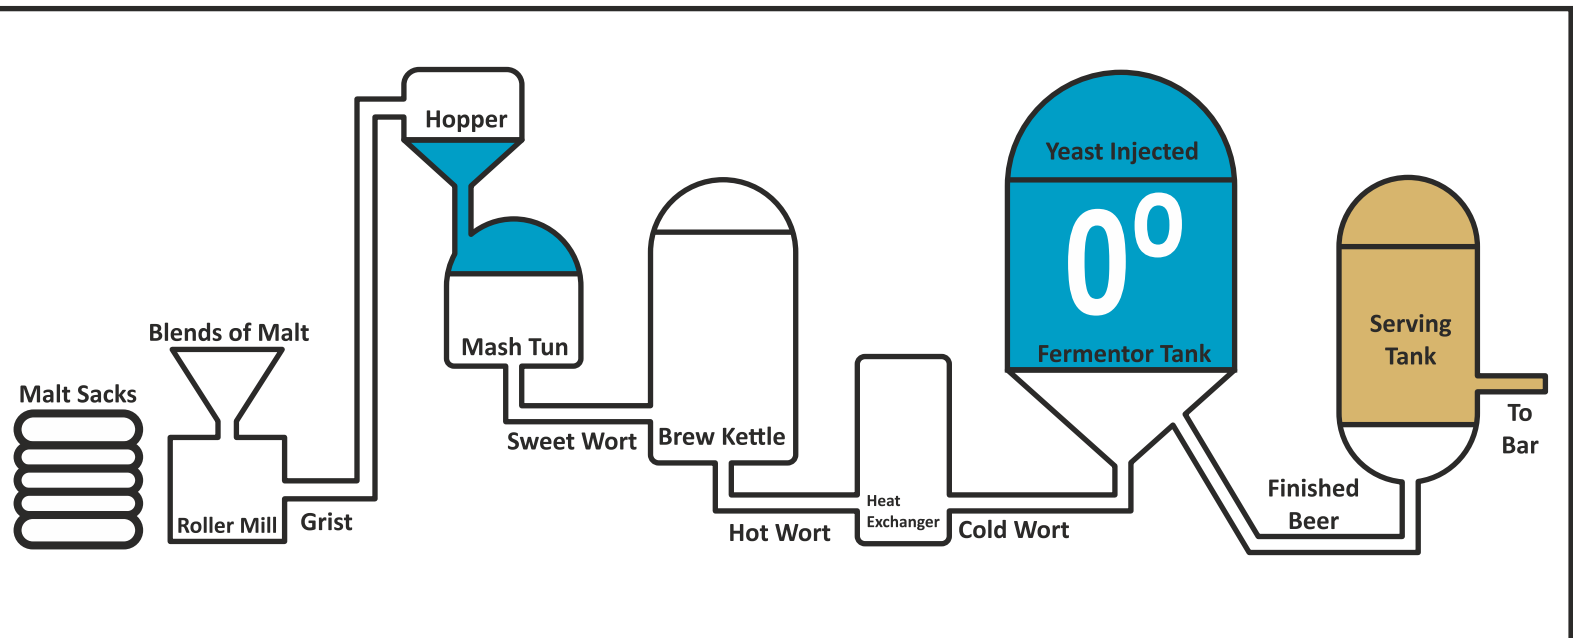

Winery

Padmatech Industries Pvt. Ltd is specialized in the turn-key project for production of wine.

Our company has gathered a group of high-quality professionals and technical talents and we are committed to independent research and development, technological innovation, and pursuing perfect product quality to be the leading enterprise in the domestic market.

Our products have passed ISO9001–2015 quality certification.

Brewing in the brewery by a brewer makes the beer. The execution is highly precise and in fact sophisticated. It requires a series of steps, to make a good brew. It has to go through the phases of Malting, Milling, Mashing, Lautering, Boiling, Fermenting, Conditioning, Filtering, and Packaging. I have shortly shown about each of the steps, through the bellow mention block diagram.

Other Focused Area:

Padmatech is ISO 9001–2015 TUV (SUD) certified for professionally managed Engineering in design, Manufacturing and supplying process equipment and providing turn-key projects in industry. We have an outstanding experience in the field of design, fabrication, supply, erection and commissioning in industries.

Our Focused Industries

- Beverages Industries
- Pharmaceutical Industries
- Chemical Industries
- Paper & Pulp Industries
- Textile Industries
- Metal Processing Industries
- Rubber Industries
- Oil & Gas Industries
- Polymer Industries

Our Products :

Chemical Processing Equipment

- Reactors
- Condenser
- Fermenter
- Tray Dryer

Material Mixing & Granulation Equipment

- Single Shaft Mixer
- Blenders
- Twin Shaft Mixer
- Roll Compactor
- Sieve Shaker
- Granulators

Heating & Cooling System

- Hot Air Oven
- Steam Radiators
- Heat Exchanger
- Quenching Tank
- Hot Water Generator

Material Handling System

- Pneumatic Conveyor System
- Trolleys
- Conveyor (45°, 90° & 180°)
- Silo System

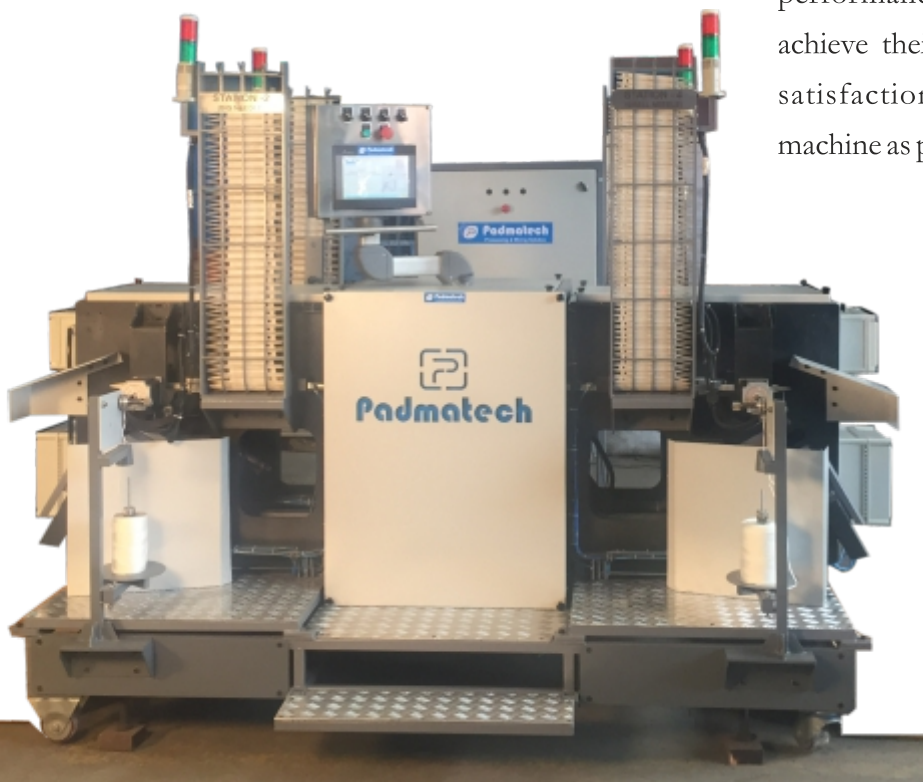

Turn-Key Projects

- Multiple Effect Evaporator (MEE)
- Effluent Treatment Plant (ETP)
- Zero Liquid Discharge System (ZLD)
- Water Treatment Plant (WTP)
- Distillery / Microbrewery / Winery Plant
- Evaporation / Concentration Plant & Dryers

Special Purpose Machines:

We support our customers for their need to enhance productivity, optimize process, performance and safety to enable them to achieve their manufacturing goals to their full satisfaction by providing special purpose machine as per their specifications.

Our Esteem Customers

Chemical Industry

- Lavender Laboratories Pvt. Ltd
- Viswa Laboratories Pvt. Ltd.
- Serra Fine Chemicals Pvt. Ltd.
- aSai Vishwa Speciality Chemicals Pvt. Ltd.
- Scottish Chemical Industrie
- Hyosung T & D India Pvt. Ltd.
- Sterling Auxiliaries Pvt. Ltd.
- Sal Middle EAST

Pharmaceutical Industry

- Astrid Life Sciences Pvt. Ltd.
- Therachem Reasearch Medilab (India) Pvt. Ltd.
- ACG Associated Capsules Pvt. Ltd.

Brewerages Industry

- Bottled Oak Beverages
- Irish Village
- Singla Hopitality
- Brewcraft Microbrewing Pvt. Ltd.

Engineering Industry

- Schenck Process India Pvt. Ltd.
- Endress + Hauser India Pvt. Ltd.
- Enpro Industries
- Godrej Industries
- Tharmax Limited

Metal Processing Industry

- Pyrotek India Pvt. Ltd.
- Lubrikote Specialities Pvt. Ltd.

Textiles Industry

- Garware Technical Fibers

Automobile Industry

- Force Motors
